# Join the *Crew*

Trusted by over 150,000 companies to protect their teams—one step at a time.

Since 1984, **Shoes For Crews®** has led the industry in slip-resistant footwear. We pioneered the original slip-resistant outsole and have been innovating ever since—designing shoes that help reduce workplace accidents and protect professionals across food service, healthcare, hospitality, manufacturing, logistics, and more.

Each year, slips, trips, and falls are estimated to cost European businesses nearly **€71 billion** in claims, lost productivity, and operational downtime. At Shoes For Crews Europe, we help mitigate that risk with proven safety outcomes—our shoes reduce slip-related injuries **by up to 67%** and outperform competitors with **44% higher traction scores**.

**A family of brands for every job**

We offer over **110 styles** across proprietary and partner brands—all backed by our industry-leading outsole technology.

**SFC Brands**

- **Shoes For Crews®** – The original slip-resistant work shoe
- **SFC PRO®** – Heavy-duty industrial durability
- **MOZO®** – Where kitchen performance meets personal style
- **LILA™** – Advanced slip resistance for women in the workplace

**Partner Brand** featuring our exclusive slip-resistant outsoles:

- **PUMA® SAFETY**

**Why companies choose us**

- **40+ years of Slip Resistance Expertise** – Proven solutions trusted by leading industries
- **Fast, Reliable Delivery** – Supported by strategic logistics centres in the Netherlands and the UK
- **Certified Excellence** – Outsoles engineered to exceed requirements such as EN ISO 20344:2021 slip resistance standards
- **Tested for Safety** – Many of our styles are certified under EN ISO 20347:2022 or EN ISO 20345:2022
- **Sustainability in Practice** – Proud holder of the EcoVadis Bronze Medal for our responsible practices

We make safety simple—for you and your crew. Let's protect your workforce together.

# Mighty Mat!<sup>TM</sup> and More

Whether you're kitting out a restaurant, factory, or healthcare setting, these anti-fatigue, slip-resistant mats help reduce strain and keep you steady through long shifts while our comfort insoles provide you with added safety.

**Care & Cleaning:** Easy to clean in the sink, dishwasher or right on the floor! Scrub with a brush and detergent or run through a complete dishwasher cycle. To avoid rips and tears, never hang to dry by the handles or drainage slots.

Thin Enough to Fit Under Most Doorways!  
Low-profile for high-traffic areas

**MIGHTY MAT!<sup>TM</sup> CLASSIC**  
**STYLE # 20** | Black | 152.4 x 91.44 cm

- High traction, slip-resistant surface
- Patented slip-resistant rubber base
- All grip upper with serrated edge for added durability
- Height: 6.5 mm – fits under doorways

Cushioned and Rubberized!  
The ultimate in slip resistance

**MIGHTY MAT!<sup>TM</sup> MAX II**  
**STYLE # 40** | Black | 121.92 x 91.44 cm

- High traction, slip-resistant surface
- Rubberised diamond plate pattern
- Patented slip-resistant rubber base and grid pattern
- Anti-fatigue cushion provides all day comfort

- Height: 14.8 mm

**COMFORT INSOLE (ON THE LEFT)**  
**STYLE # N3411** | Blue | 37–50

- Adaptable arch allows foot to react to natural movements
- EVA cushioning layer

**COMFORT INSOLE WITH GEL (ON THE RIGHT)**  
**STYLE # N2114** | Blue | 37–48

- The supple arch follows the natural movement of the feet
- Shock-absorbing gel pads for maximum comfort
- Polyurethane padding

**SFC CREW SOCKS**  
Unisex sock recycled material  
**STYLE # S2307** | Black | S–XL

- Made with 100% recycled polyester material
- Extra cushioning throughout the sock
- Extra elastic in leg and arch band

Unisex sock merino wool  
**STYLE # S2308** | Black | S–XL

- Blend of 38% merino wool, 38% polyester, 22% polyamide and 2% elasthane
- Extra cushioning throughout the sock
- Extra elastic in leg and arch band
- Nylon reinforcement in toe and heel

**SFC NO-SHOW SOCKS**

Coming *Soon*...

# Safety *Categories*

The distinction between occupational and safety shoes is necessary because not every occupational shoe is automatically categorized as a safety shoe: Occupational shoes can provide

protective elements such as slip resistance or protection from liquids, but they lack the protective toe cap. Safety shoes must have a protective toe cap that can withstand a load of at least 200 joules.

## OCCUPATIONAL SHOES (Categories as of norm EN 20347)

	Closed heel area	A Antistatic	E Energy absorption of seat region	WPA No water penetration in upper material	WR Water resistance	Cleated outsole	P/PS/PL Penetration protection made of steel or composite
OB

O5	●	●	●	●		●	●
O6	●	●	●		●		
O7	●	●	●		●	●	●

The categories **OB**, **O1**, **O2**, **O3**, **O6** and **O7** refer to shoes made of leather or textiles and other materials.  
The **O4** and **O5** categories are shoes that have been wholly moulded, including solid rubber shoes (i.e. vulcanised shoes as a whole).

**Further categories:**  
**AN:** Ankle protection  
**C:** Partly conductive  
**CI:** Cold insulation  
**CR:** Cut resistance  
**ESD:** Electrostatic discharge  
**FO:** Resistance to fuel oil  
**HI:** Heat insulation  
**HRO:** Resistance to heat contact  
**LG:** Ladder grip  
**M:** Metatarsal protection  
**SC:** Scuff cap abrasion  
**SR:** Slip resistance (ceramic tile floor with glycerine)

# Slip-resistant Outsole Technologies

Safe grip with every step — outsole technology you can rely on.

Whether in hospitality, healthcare, or retail, wet or oily surfaces can quickly become a hazard for workers throughout the day. The trusted **SFC OUTSOLE** provides safety with every step. As the tests below demonstrate, its excellent slip resistance far exceeds the industry standard. This effectively helps decrease and prevent workplace accidents caused by slipping or falling.

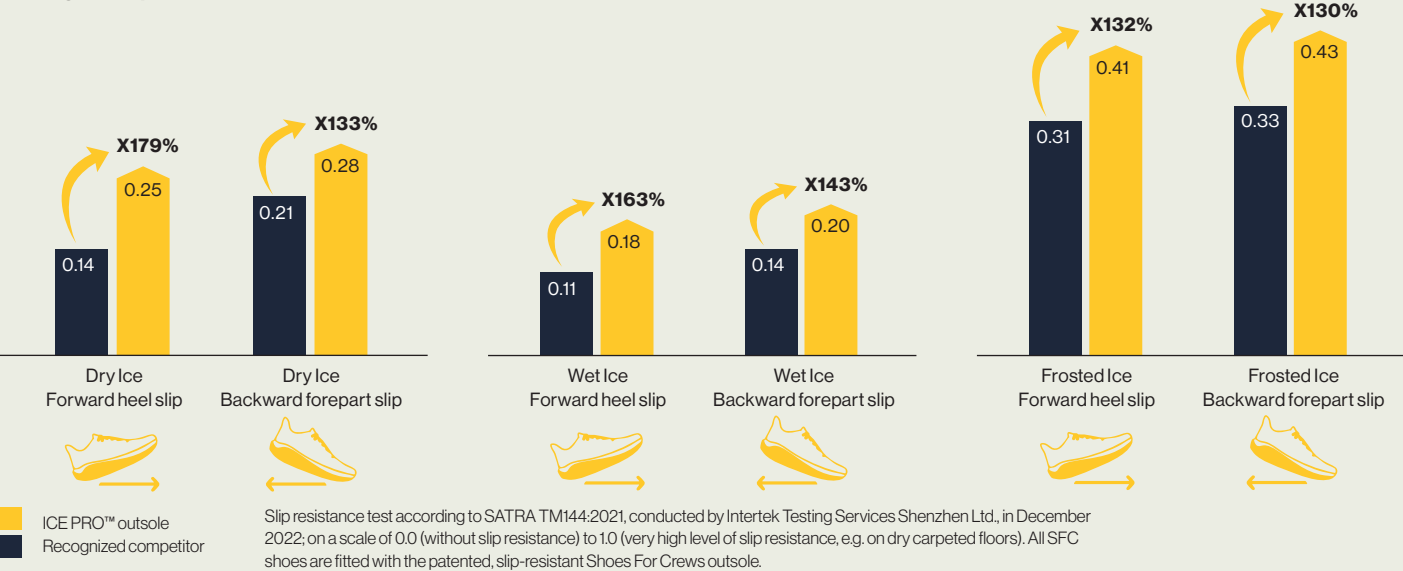

Testing the slip resistance of our **SFC OUTSOLE** [EN ISO 20344:2021]

Reliable traction, even on ice. Slushy snow and wet or frozen ice are extremely unfavourable conditions for safe work. That's precisely why we've developed the **ICE PRO™ OUTSOLE**. With its unique structure and sophisticated material blend, it provides superior slip resistance on icy surfaces when compared with the competition.

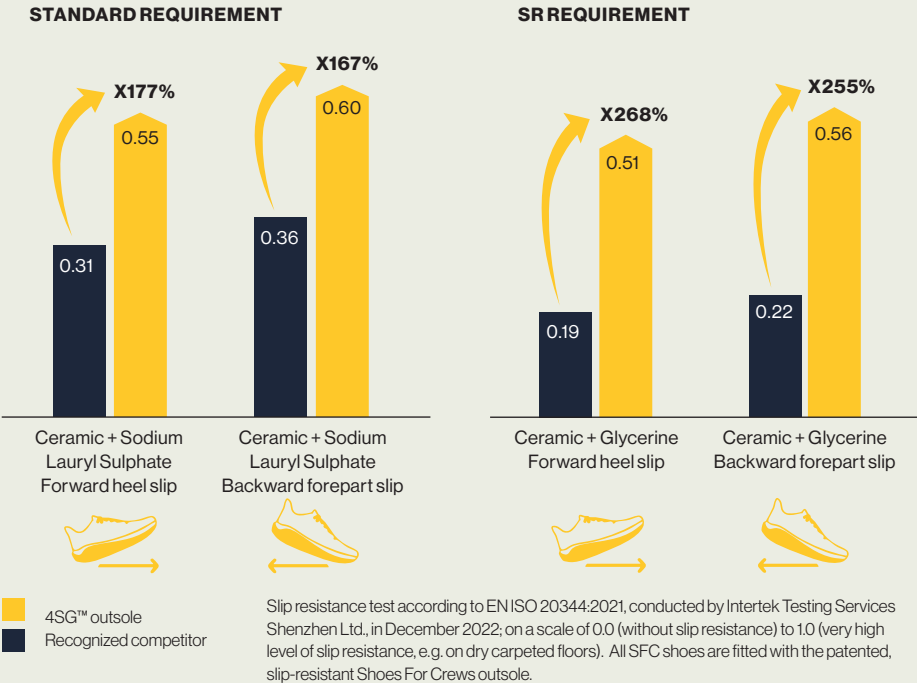

The structure and material compound of the **ICE PRO™** outsole provide high levels of slip resistance, particularly on icy surfaces.

Testing the slip resistance of our **ICE PRO™ OUTSOLE** on ice [SATRA TM144:2021]

The all seasons grip sole: Prevent accidents on wet, icy, and oily surfaces: Our **4SG™ FOUR SEASONS GRIP OUTSOLE** is specifically designed for challenging surfaces and environments — across all seasons and weather conditions. It meets the EN ISO 20344:2021 standard and surpasses the industry standard in terms of slip resistance and safety. As the results on the following page demonstrate, this outsole offers exceptional slip resistance properties — even on ice!

Testing the slip resistance of our **4SG™ FOUR SEASONS GRIP OUTSOLE** [EN ISO 20344:2021]

# Committed to *Tomorrow*

In 2025, we continue to reduce the ecological footprint of our shoes.

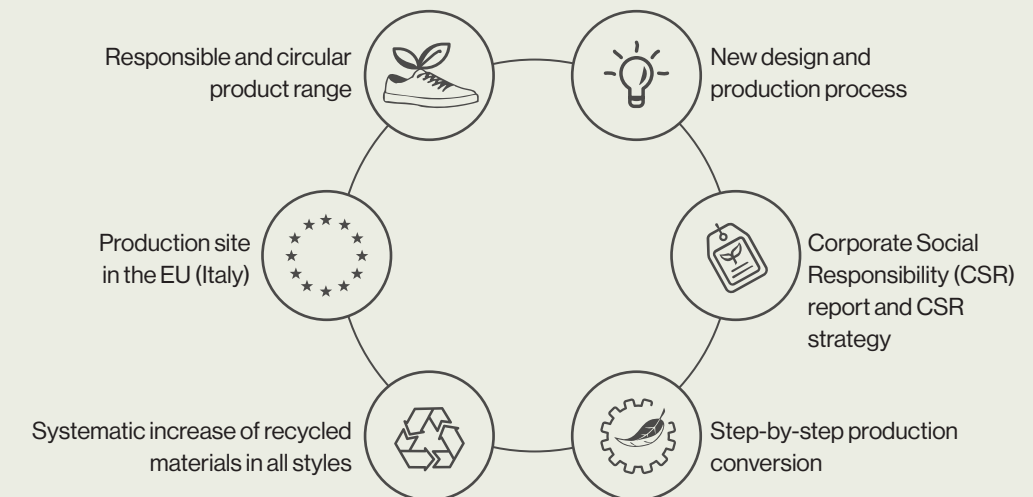

Our world is changing, so we can't stand still. To be ready for the future, Shoes For Crews is developing new materials and production methods to decrease our environmental footprint, step by step. We have therefore established an ISO 14001-certified environmental management system (EMS).

Shoes For Crews has been awarded the 2025 EcoVadis Bronze Medal, recognising our commitment to sustainability in Environment, Labour and Human Rights, Ethics, and Sustainable Procurement. This award reflects our ongoing efforts to reduce our environmental footprint, operate responsibly, and improve our processes step by step.

Our strategy for sustainable products:

We support the United Nations' Sustainable Development Goals and have been a member of the UN Global Compact since March 2024.

Our circularity process for eco-products:

Used PET bottles are converted to a granulate which we use to manufacture, among other things, a new inner lining for our shoes. The EVA material from old flipflops is granulated and recycled to produce new insoles. Old tyres are separated into their constituent materials, and the rubber is processed into granulate or powder form. From this, we make components for our new outsoles.

# Welcome to the *crew*
